

# Lauren McDermid Melville

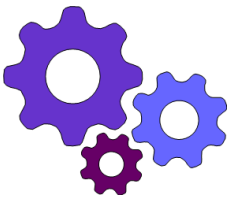

Sectioned Elevation

Rendered Model

Lauren has been awarded Graphic Designer of the month for her 3D CAD Lego Vehicle where she showed determination and resilience to learn a new computer package. She has used her **Critical Thinking Skills** and **Communication Skills** to produce an accurate complex lego car design as part of her Nat 5 Graphic Communication coursework.

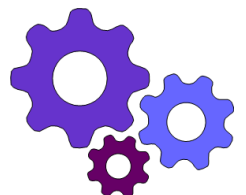

# Alec Miller

## St Leonards

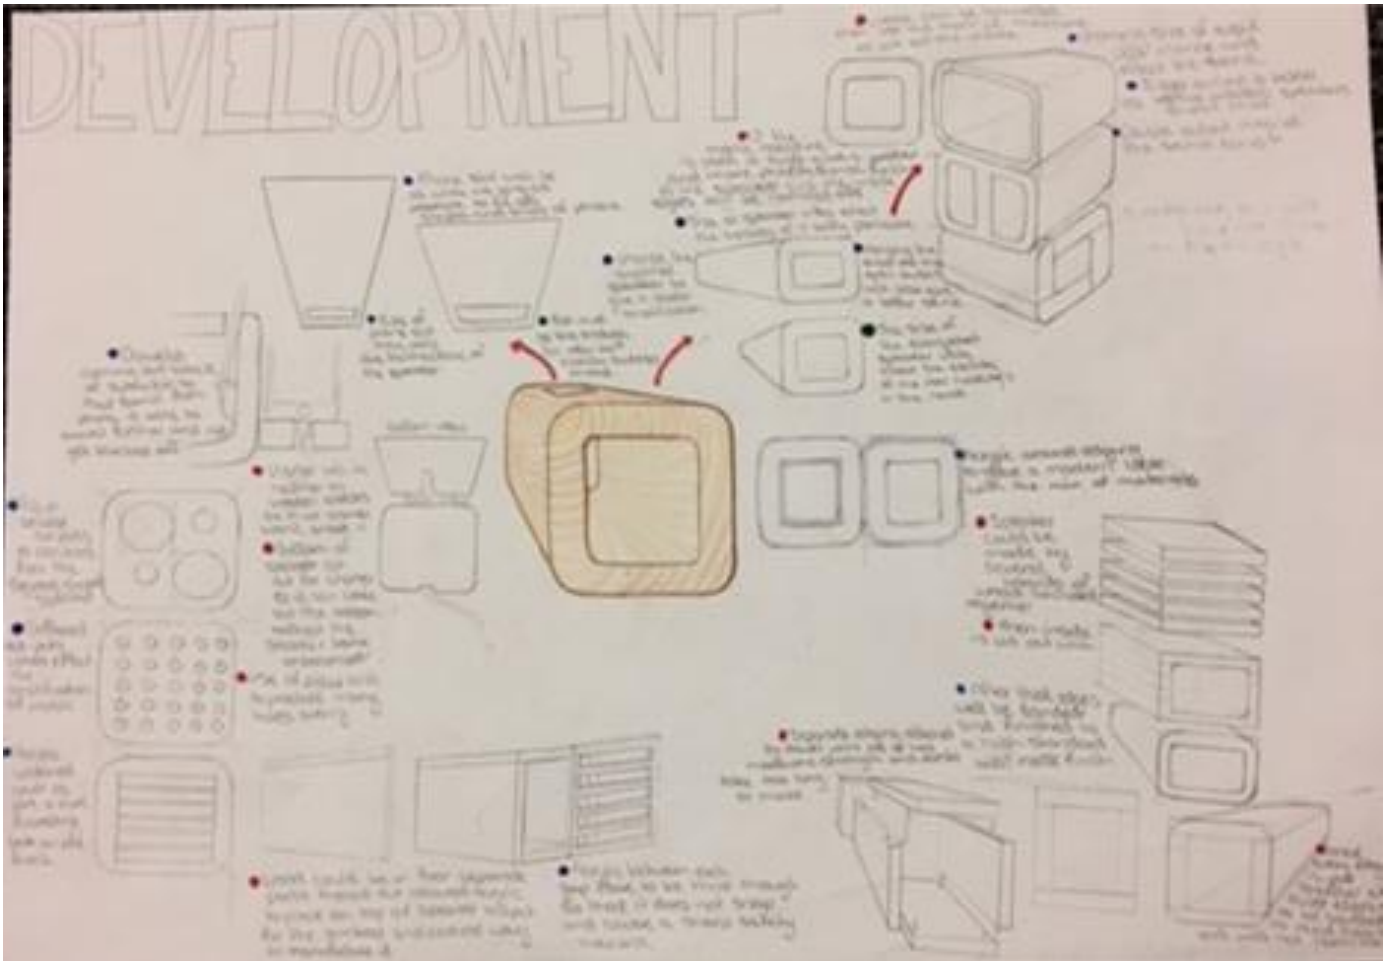

Alec has been awarded Manufacturer of the month for his highly creative Phone and Headphone Holder. He showed resilience and determination , working independently to make a unique high quality product that works well, is safe to use and looks brilliant . Alec has used **Creativity** and **Critical Thinking skills** to adapt and improve his product using scrap wood to create an additional headphone part creating a secondary function by thinking outside the box.

# Lucy Sayers

## St Annes

Lucy has been awarded Product Designer of the month for her folio development work. She has used **Critical Thinking** to problem solve and make independent decisions on the evolution of her product. She has **communicated** her ideas through both sketching and by adding written annotation to justify her choices with reference to the specification. This is a great example of development work showcasing Lucy's **creativity** and resourcefulness in design work.
